

Ken San Angelo

Web Development Portfolio

H&H Products Company

- hhproductscompany.com
- E-commerce site, built on Wordpress and Woocommerce.
- All custom-built animations (using CSS animations when possible for performance).
- Worked with web designer to create pixel perfect site.

Dollar Font Club

- dollarfontclub.com
- A font hosting service built with MERN (Mongo, Express, React, Node) and Electron.
- Planned and led project as lead developer.
- Built a stylesheet generator and font hosting platform (similar to Google Fonts), as well as a desktop application that installs and manages fonts on the user's computer.

Fracture

- fractureme.com/upload
- An image upload and editing web application for an image printing and framing service.
- Front-end built with React, connects to an external API for processing and checkout process.
- Worked with other development teams to build, test, and update web application.

Gold Tone Music Group

- goldtonemusicgroup.com
- Fully custom-built e-commerce site
- Built on the LAMP stack (Linux, Apache, MySQL, Php).
- Combines 6 previous sites into one site that promotes cross-selling of brands.
- Branded, designed and build this site myself.
